More than 560 small business leaders ask Governor Baker to support 20% solar by 2025

Dear Governor Baker,

Solar energy is growing rapidly, with major benefits for communities across Massachusetts.

Solar is good for our economy, supporting more than 12,000 jobs in all regions of Massachusetts. While the cost of fossil fuels is unpredictable and likely to rise over time, solar can provide businesses with clean, affordable energy at a stable price.

Solar is good for our environment, too. At a time when communities across the state are feeling the impacts of global warming firsthand, solar energy is a smart way for Massachusetts to cut its carbon emissions. Solar also helps to reduce pollutants like mercury and nitrogen oxides that contaminate our air and water.

For the sake of our environment, our health, and our economy, we are asking you to be a champion for solar energy. Please commit to getting 20% of Massachusetts’ electricity from the sun by 2025.

Sincerely,

[see attached]
